

NEED A GOOD RESUME?

One that is affordable, professional ...
& tells your story?

Whether you are a recent graduate looking for the right job, re-entering the workforce or ready to jumpstart a stagnant career, your resume, cover letter and other written materials should stand out. **WORDS AND APPEARANCE MATTER AND SHOULD CONVEY THE RIGHT MESSAGE ABOUT YOU!**

The resume is your professional story – it “sells” your expertise, education, training, skills and experience to potential employers. If that message is not apparent at first glance – odds are the resume will not be read.

There are two kinds of resumes: the one that is well constructed and one that isn't:

- The good resume says it all at a glance: **I am a candidate you want to interview!**
- The bad resume also says it all at a glance: **There's nothing here that tells me why this person deserves an interview!** The bad resume can also be wordy and confusing, or look too cutesy.

Use the services of a professional and skilled word writer who has solid experience and knows the language to create strong materials that **PROMOTE YOU**: materials such as a resume or curriculum vitae, cover letter, personal statement, and more.
